*Collaborating in Quality Care*

## Qualified professionals right here to care for you!

For conditions that arise or chronic health issues that require monitoring, Nurse practitioners are on-site to care for residents. These highly trained medical professionals are available Monday through Friday from 8 a.m. to 5 p.m. and on-call to be reached when needed during nights and weekends. They are a vital part of the care team, ensuring that we can do our best to treat in place and avoid a trip to the hospital.

Stafford Services nurse practitioners see patients within 24-72 hours of admission and follow up with patients 2-3 times per week. Long-term care patients are seen at least monthly, and certainly more frequently in cases of changing condition to ensure the patient is medically stable.

### COLLABORATIVE CARE

Nurse practitioners are the clinical bridge between the physicians who oversee the medical care of our residents and the bedside nurses and care assistants who take daily care of our residents' needs. They are highly trained and licensed advanced practice providers who have an extra focus on disease prevention and health management.

Nurse Practitioners work closely with our team of caregivers to:

- Serve as a clinical liaison between the physician, patient and facility team
- Ensure the physician's care plan is implemented and protocols are followed
- Monitor status and changes for timely clinical intervention
- Educate and counsel residents, families and staff
- Advocate for residents and families

**Stafford Services nurse practitioners can be contacted through your nurse. To reach the on-site Nurse Practitioner during daytime weekday hours or to have them paged on nights or weekends, speak with your nurse.**

### BENEFITS OF STAFFORD SERVICES ON-SITE
